

MOUNT YOUR TAG

- Mount the *E-ZPass Tag* with the label facing you and the arrows pointing up. Place the Tag in the upper portion of the windshield at least one inch to the right of the center support of the rearview mirror and at least one inch below the tinted section of the windshield.
- Do not hold the Tag or place the Tag on the dashboard while traveling under a gantry. Holding your Tag is unsafe and may cause your Tag not to read which will result in a higher toll rate.
- To order additional mounting strips, download the official **TOLLS NY** mobile app or access your account at **e-zpassNY.com**.
